

## **Best Practices for Effective Professional Development\*** **~ A Planning Tool ~**

*Your commitment to these principles will help you create training opportunities that promote change or growth, reach clear outcomes, and help people develop new relationships.*

### **1. Establish and share clear outcomes**

What are the goals and objectives of your training session?

List the ways you will help participants to know where they are within the training process

### **2. Design and list activities you will use to engage all participants**

How will you provide for varied learning styles? How will you ensure that all participants are involved in learning?

### **3. Model effective learning processes and environments:** Make sure participants are learning by being engaged in the process (model good interpretive technique if you are teaching interpretation)

### **4. Establish clear roles**

- List who is involved in the training/workshop/task and their primary role(s)
- State the task you wish your participants to accomplish
- What method(s) will you use to remind participants of their responsibility for achieving the task as appropriate/needed

5. **Have participants take responsibility for reaching the stated outcomes**
  
6. **Connect with participant's own work and thinking**
  - How does the content directly apply to participants' jobs?
  
  - What methods(s) will you use to help participants connect the content of your training to their own work?
  
7. **Provide opportunities for continued learning and maintaining relationships after the event**
  
8. **Encourage participants to share what they have learned with others outside the event**
  
9. **Ensure adequate time for authentic work activity** (as close as possible to the participants' "real world" task)

Thinking about your training agenda, what sort of structured and/or unstructured work time will you include in your training session/workshop?
  
10. **Provide ample time for reflecting on the information and experiences**

Account for reflection time in your training agenda – how will you provide dedicated time for this needed aspect of learning?

### **Meaningful Evaluation!**

What form of evaluation will you use? Will you incorporate formative and summative evaluation? Is there a need for an independent evaluator?
